PRODUCTION SPECIFICATIONS

Aloha Visitor Guides will be produced using up-to-the-minute publishing technology. Always send a proof with your ad. All files submitted not conforming to our specifications will require production time and will incur additional production charges.

ACCEPTED SOFTWARE

Macintosh-formatted digital files: QuarkXPress, Adobe Photoshop, Adobe Illustrator, and PDF files, however additional charges may be necessary to make press ready.

ACCEPTED FILE FORMATS

Color Images: Save in CMYK color mode as TIFF. Black and White Images: Bitmap or Grayscale TIFF. Image Resolution: CMYK and Grayscale 300dpi at 100% of size. Bitmap images 800dpi at 100%.

CORRECT QUARKXPRESS SETUP

Document Size: (please see Mechanical Requirements). Bleed ads: The document size should match the trim size. Extend items that will bleed 1/8" beyond the page edges into the pasteboard area. For a full bleed, extend all four sides. Live Matter Area: Keep all text 1/4" inside the trim to ensure that text does not get cut off. Correct Color Palette Settings: Convert all

RGB colors to CMYK. Convert all spot colors, including Pantone, to CMYK. Perform a "Collect for Output": This will notify you if any graphics are missing. You must update all modified graphics. Fonts: Be sure to collect both parts of each PostScript font (screen font and printer font).

COLOR PROOFS

Please DO NOT rely on ink jet printers for accurate color proofing. Most ink jet printers do not yield accurate CMYK color output.
